Congratulations

Dear Customer:

Welcome to the Euhomy family. Thank you for purchasing one of our products.

Our goal is to provide you with superior service. If there is anything missing from or wrong with your order, or if you have any questions about using our product, PLEASE contact us.

Email: support@euhomy.com

Facebook: @Euhomy.Official

The Euhomy team is available 24/7 to address your questions, comments, and concerns. Your satisfaction is our ultimate goal. We want to make everything right so you'll share your positive experience with other shoppers on Amazon.

If you experience any problems, please send an email to support@euhomy.com.

Our mission:

- * To be the most trusted appliance brand.
- * To create practical, compact appliances that better your life.

Be sure to register at
www.euhomy.com/register
for updates, warranty, and other relevant information.

IMPORTANT SAFETY INSTRUCTIONS

Your safety and the safety of others are very important.

This wine cooler complies with the applicable safety requirements and is safe for daily use. However, basic safety precautions should always be followed when using an electrical appliance, to reduce the risk of fire, electric shock, and personal injury.

DANGER

- Plug the cooler into its own electrical outlet with a voltage rating that matches the rating label on the cooler (**115/120V AC only, 60Hz, 10A**). Use receptacles that cannot be turned off by a switch or pull chain. Be sure that the plug is fully inserted into the receptacle.
- Plug into a grounded 3-prong outlet. Do not under any circumstances cut or remove the third ground prong from the power cord supplied.
- To protect against electric shock, do not immerse the wine cooler, plug or cord in water or other liquids.
- Never unplug the cooler by pulling the power cord. To disconnect the wine cooler, always grip the plug firmly and pull straight out from the wall outlet.
- Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end.
- Do not connect or disconnect the electric plug when your hands are wet. Do not operate the cooler with wet hands, while standing on a wet surface or while standing in water.
- Unplug the wine cooler or disconnect power before cleaning or servicing. Failure to do so can result in electrical shock or death.
- When moving the wine cooler, be careful not to roll over or damage the power cord.
- Never clean wine cooler parts with flammable fluids. These fumes can create a fire hazard or explosion. And do not store or use gasoline or other flammable vapor and liquids in the vicinity of this or any other appliance. The fumes can create a fire hazard or explosion.
- Do not attempt to repair or replace any part of your wine cooler unless it is specifically recommended in this manual. All other servicing should be referred to a qualified technician.
- An empty wine cooler can be dangerous to children. Remove any latches, lids, locks, and/or doors from unused or discarded wine coolers to prevent child entrapment and suffocation. Never allow children to operate, play with or crawl inside this wine cooler.

1. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have received supervision or instruction on the use of the appliance by a person responsible for their safety.
2. Children should be supervised to ensure that they do not play with the appliance.
3. This appliance can be used by children aged 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have received supervision or instruction on the safe use of the appliance and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be performed by children without supervision.
4. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified person to avoid a hazard.
5. To avoid a hazard due to instability of the appliance, it must be installed in accordance with the instructions.
6. When positioning the appliance, ensure the supply cord is not trapped or damaged.
7. Do not locate multiple portable socket-outlets or portable power supplies at the rear of the appliance.
8. Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
9. Do not use mechanical devices or other means to accelerate defrosting, other than those recommended by the manufacturer.
10. Do not damage the refrigerant circuit.
11. Do not use electrical appliances inside the drink storage compartments of the appliance unless they are recommended by the manufacturer.
12. Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
13. This appliance is intended to be used in household and similar applications such as
 - staff kitchen areas in shops, offices and other work environments;
 - farm houses and by clients in hotels, motels and other residential environments;
 - bed and breakfast environments;
 - catering and similar non-retail applications.
14. To avoid contamination of drink, please respect the following instructions:
 - Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
 - Regularly clean surfaces that can come in contact with drink and accessible drainage systems.
 - Clean the water tanks if they have not been used for 48 hours; flush the water system connected to a water supply if water has not been drawn for 5 days.
 - If the refrigerating appliance is left empty for long periods, switch off, defrost, clean, dry, and leave the door open to keep mold from developing in the appliance.

WARNING: Risk of fire / flammable materials

The coolant circuit of this unit contains the refrigerant Isobutane (R600a), a natural gas that is flammable and of high environmental compatibility. Make sure no parts of the coolant circuit are damaged during transportation and installation of the appliance.

WARNING

- Do not use this wine cooler for other than its intended purpose. For indoor, household use only.
- Moving the wine cooler requires 2 people. Failure to do so can result in injury.
- Place the wine cooler in a well-ventilated area with temperatures above 15°C (60°F) and below 32°C (90°F).
- To ensure proper ventilation, the front of the cooler must be completely unobstructed.
- The wine cooler must be installed in an area away from wind, rain, and water spray or drips.
- The wine cooler should not be located next to ovens, grills or other sources of high heat.
- Do not kink or pinch the power supply cord of wine cooler.
- The wine cooler must be leveled in order to work properly. You may need to make several adjustments to level it.
- This wine cooler is designed for storing and cooling wine. Do not store perishable food or medical products in the cooler.
- When disposing of refrigeration wine coolers, special handling is often required. It is the consumer's responsibility to comply with federal and local regulations when disposing of this product.
- **WARNING:** Risk of child entrapment and suffocation. Before you throw away this or an old cooler, remove the door. Leave the shelves in place, so that children may not easily climb inside.

FLAMMABLE REFRIGERANT GAS

DANGER – Risk of fire or explosion. Flammable refrigerant used.

DO NOT use mechanical devices to defrost refrigerator. DO NOT puncture refrigerant tubing.

DANGER – Risk of fire or explosion. Flammable refrigerant used. To be repaired only by trained service personnel. **DO NOT puncture refrigerant tubing.**

CAUTION – Risk of fire or explosion. Flammable refrigerant used. Consult repair manual / owner's guide before attempting to service this product. All safety precautions must be followed.

CAUTION – Risk of fire or explosion. Dispose of property in accordance with federal or local regulations. Flammable refrigerant used.

CAUTION – Risk of fire or explosion due to puncture of refrigerant tubing. Follow handling instructions carefully. Flammable refrigerant used.

CAUTION – To prevent a child from being trapped, keep out of reach of children and not in the vicinity of the cooler.

INSTALLATION INSTRUCTIONS

Before Using Your Wine Cooler

- Remove the exterior and interior packaging.
- Check to be sure you have all of the following parts:
 - o 14 Shelves
 - o 2 Keys
 - o Stainless Steel Handle
 - o Instruction Manual
 - o 2 Extra Screws for Installing Handle
- **IMPORTANT:** Before connecting this wine cooler to a power source, let it stand upright for approximately **24 hours**. This will reduce the possibility of a malfunction cooling system from handling during transportation.
- Clean the interior surface with lukewarm water using a soft cloth.
- Install the handle on the left side of the door.

To Installing the Stainless Steel Handle

- 1) Pull away the door gasket around where the handle is to be installed, as Illustration #1. The gasket is easily removed by hand, no tools are necessary.
- 2) Align the handle with the pre-installed screws on the door frame. Tighten the screws with a screwdriver until the handles secure tightly against the door frame, as shown in Illustration #2. (Do NOT over tighten as this will damage the handle assembly).
- 3) Replace the door gasket in its original position.

Note: This wine cooler includes stainless steel handles that are not required to operate this wine cooler. If you choose not to use the handle supplied, simply follow step 1 to access the pre-installed screws and remove them and then place 2 decorative plugs (NOT included) into the two holes separately. Continue on to step 3 to replace the door gasket to its original position.

To Installing the Your Wine Cooler

- This wine cooler is designed for freestanding or built-in (fully recessed) installation.
- Place the wine cooler on a solid and level floor that is strong enough to support it when it is fully loaded. This will ensure vibration- and noise-free operation. Adjust the leveling legs in and out to stabilize the cooler horizontally. If the legs are not properly adjusted, the cooler may be unstable and result in excess noise or vibration.
- Locate the wine cooler away from direct sunlight and sources of heat (stove, heater, radiator, etc.). Direct sunlight may affect the acrylic coating and heat sources may increase electricity-consumption. Extremely cold ambient temperatures may also cause the cooler not to perform properly.
- It is not advisable to install this cooler in a damp area or directly adjacent to a kitchen sink, as moisture can cause premature corrosion to the components of your new cooler.
- It is recommended you install the wine cooler in a place with temperatures **above 60°F (15°C) and below 90°F (32°C)** and humidity under 60%. If the ambient temperature is above or below the recommended temperatures, the performance of the cooler may be affected. Placing your cooler in extremely cold or hot conditions may cause interior temperatures to fluctuate, and the temperature range of 5°C–18°C (40°F–65°F) may not be reached.
- Connect the wine cooler to an exclusive, properly grounded, standard electrical supply (**115 V AC only, 60 Hz**), in accordance with federal and local electrical codes and ordinances. Any questions concerning power and/or grounding should be directed to a certified electrician or an authorized products service center.

⚡**Warning**⚡: Improper use of the grounded plug can result in electrical shock. If the power cord is damaged, have it replaced by an authorized service center.

- The wine cooler should always be plugged into its own individual electrical outlet with a voltage rating that matches the rating label on the wine cooler. This provides the best performance and also prevents overloading house wiring circuits, which could cause a fire hazard from overheating.
- Do not under any circumstances cut or remove the third ground prong from the power cord supplied.
- Do not use an extension cord or adapter plug. However, if you must use an extension cord, it is absolutely necessary that it be a UL-listed, 3-wire grounding extension cord with a grounding plug and outlet and that the electrical rating of the cord is 10 amperes (minimum) and 120 volts.
- Do not use a cord that shows cracks or abrasion damage along its length or at either end.
- If the wine cooler will be used in an area that is prone to power surges/outages, it is suggested that you use a power surge protector. The surge protector that you select must have a surge block high enough to protect the wine cooler it is connected to. Damages due to power surges are not considered a manufacturer covered defect and will void your product warranty.

OPERATION INSTRUCTIONS

Recommended temperature settings

Wine conservation: 12°C–14°C (53°F–57°F)

Rose and sparkling wines: 5°C–8°C (41°F–46°F)

Dry/white wines: 9°C–12°C (48°F–53°F)

Red wines: 14°C–18°C (59°F–65°F)

*Temperature °C may varies between $< + 2$ °C

Controls

After the wine cooler is plugged into a wall outlet, the cooler will turn on automatically and the LCD screen will show the temperature inside of the cooler.

After setting your desired cooling temperature, allow the appliance to cool down for **3 to 4 hours** before placing wine bottles inside the cooler.

Temperature setting range: Upper zone: 5–13°C (40–55°F) Lower zone: 13–18°C (55–65°F)

	Press for 3 seconds to turn on /off the appliance
	Adjusts the temperature in 1-degree increments
	Adjusts the temperature in 1-degree decrements
	Press to begin adjusting the temperature for upper or lower zone
	Toggles the temperature display between Celsius and Fahrenheit
	Turns the interior light on or off

Storage

This wine cooler is designed to store standard Bordeaux 750 ml wine bottles. Many bottles differ in size and dimensions. As such, the number of bottles you can store may vary. Storing large and/or oddly shaped bottles (including champagne and sparkling wine bottles) will decrease the capacity of your wine cooler.

Door Lock

This cooler may be secured with a lock and key. The keys are included with the Instruction Manual. Insert the key in the lock and turn it clockwise to lock the door, making sure the metal pin is engaged completely. To unlock the door, do the reverse. Remove the key and put it in a secure location.

Shelves

This wine cooler is equipped with a sliding rail assembly where you can move the wooden shelves out and in smoothly.

The slide-out shelves allow bottles of wine to be viewed and removed more easily. Any of the shelves can be removed to store larger bottles.

To prevent damaging the door gasket when pulling shelves out of the rail compartment, make sure the door is completely open. For easy access to the bottles, you may need to pull the shelves approximately halfway out of the rail compartment.

To Removing a Shelf

1. Remove all bottles from the shelf.
2. Pull the shelf out as far as it will go.
3. Adjust the lever on each side of the shelf, as shown below (UP on the left, DOWN on the right) and at the same time, pull the shelf out completely.

up on the left

DOWN on the right

Reversing the door

1. Open the door, loosen the screw and remove the upper hinge cover; then holding the door, loosen the screws and remove the upper hinge. Make sure to hold the door during this step.
2. Lift the door release it out from the lower hinge and place it on a padded surface to avoid damage or scratches; unscrew and remove the right lower hinge axis.
3. Install the hinge axis to the left lower hinge put it onto the left side lower hinge and hold it at the closed position; install the hinge axis to the left lower hinge.
4. To place the handle back on the right side of the door body, pull out the gasket and install the handle.

CARE & MAINTENANCE

Cleaning Your Wine Cooler

IMPORTANT: Always unplug the cooler before cleaning or performing maintenance. Never use harsh cleansers or scouring pads to clean any part of the cooler.

- Turn off the power, unplug the cooler, and remove all items including shelves.
- Wash the inside surfaces with a solution of warm water and baking soda. The solution should be about 2 tablespoons of baking soda to a quart of water.
- Wash the shelves with a mild detergent solution.
- Wring excess water out of the sponge or cloth when cleaning the area near any electrical parts or the controls.
- Wash the outside of the cabinet with warm water and a mild liquid detergent. Rinse well and wipe dry with a clean soft cloth. Do not use steel wool or a steel brush to scrub the stainless steel, as this will contaminate the stainless steel with steel particles and rusting may occur.

Power Failure

Most power failures are corrected within a few hours and should not affect the temperature of your wine cooler. If the power is off for an extended period of time, proper steps should be taken to protect your contents.

While on Vacation

Leave the wine cooler operating during vacations of less than three weeks. For longer periods, turn the wine cooler off and leave the door slightly ajar to prevent odor from building in the cooler.

Moving Your Wine Cooler

- Remove all items (bottles) from the cooler;
- Securely tape down any loose items, such as shelves, inside the cooler.
- Turn the adjustable leg up to the base to avoid damage.

- Tape the door shut.
- Ensure that the wine cooler stays securely in the upright position during transportation. Protect the outside of the wine cooler with a blanket or a similar item.

Energy Saving Tips

- The cooler should be located in the coolest area of the room away from heat sources or direct sunlight.
- Ensure that the cooler is adequately ventilated. Never cover air vents.
- Only open the cooler door for as long as necessary. Frequent opening of the door will affect internal temperature.

Charcoal Filtration System

Your wine is a living object that breathes through the cork of the bottle. In order to preserve the quality and taste of your fine wines, they must be stored at the ideal temperature and ambient conditions. Your wine cooler is equipped with an active charcoal filtration system to ensure air purity, and cooling efficiency, and to maintain an odor-free environment for the storage of your fine wines.

To replace the filter

1	Remove the bottles of wine stored on the two (2) shelves in front of the filter.	 <p data-bbox="740 1273 997 1297">Turn Left to remove filter.</p>
2	Remove the shelves and set aside to be replaced once you have changed the filter.	
3	Hold the filter and turn it at 45 degrees in the counter-clockwise direction and then pull it out.	
4	Remove the filter and replace with a new one.	
5	Put the new filter into the hole and then turn the filter at 45 degrees in clockwise direction.	

TROUBLESHOOTING GUIDE

PROBLEM	POSSIBLE CAUSE	SOLUTION
The wine cooler does not run.	The wine cooler may not be plugged in, or plug may be loose	Ensure the wine cooler has been plugged in properly.
	The wine cooler is turned off.	Press  to turn on the cooler.
	House fuse blown or tripped circuit breaker.	Check/replace fuse. Reset circuit breaker.
The wine cooler is not cold enough.	External environment may require a higher setting.	Set a colder setting. Allow several hours for the temperature to stabilize.
	The wine cooler has recently been disconnected for a period of time.	It takes 3–4 hours for the wine cooler to cool down completely.
	Prolonged or frequent door openings.	Open the door less often.
	The door is not closed completely.	Close the door properly.
	The door gasket does not seal properly.	Check the door gasket. Clean or change gasket if necessary.
The compressor turns on and off frequently.	The room temperature is hotter than normal.	It's normal for the wine cooler to work harder under these conditions.
	A large amount of contents has been added to the cooler.	A large amount of content causes the wine cooler to run more until the desired temperature is reached.
	Prolonged or frequent door openings.	Open the door less often.
	The temperature has not been set correctly.	Press either  or  to check the set temperature, and set the temperature properly.
	The door is not closed completely.	Close the door properly.
	The door gasket does not seal properly.	Check the door gasket. Clean or change gasket if necessary.

PROBLEM	POSSIBLE CAUSE	SOLUTION
The light does not work.	Not plugged in.	Plug in the cooler in.
	The circuit breaker tripped or a blown fuse.	Check the breaker and/or fuses.
	The light button is "OFF".	Press  to turn the light ON.
Cooler vibrates.	The cooler is not level.	Check that the cooler is level.
	The bottles are vibrating.	Make sure the bottles don't touch each other.
	There is an object under the cooler.	Remove the object under the cooler.
The cooler seems to make too much noise.	The cooler is not level.	Level the cooler.
	Normal noise from the flow of the refrigerant	The rattling noise may come from the flow of the refrigerant, which is normal. As each cycle ends, you may hear gurgling sounds caused by the flow of refrigerant in your cooler. Contraction and expansion of the inside walls may cause popping and crackling noises.
The door will not close properly.	The cooler is not level.	Level the cooler.
	The door was reversed and not properly installed.	Re-install the door properly.
	The gasket is dirty.	Clean the door gasket.
	The shelves are out of position.	Place the shelves properly.
Moisture buildup on interior or exterior of the wine cooler.	This is normal during high-humidity periods.	Lower the room humidity.
	This is normal in high-temperature environments.	Move the cooler to a cooler place, and avoid heat and sunlight.
	Prolonged or frequent door openings.	Open the door less often.
	The door does not seal completely.	Check door gaskets for proper seal.
